High performance SÆPLAST 160 litre tub

- Ideal for small and medium sized fishing vessels and cold chain logistics
- Lightweight tub – only 17 kg
- Increased handling efficiency and shorter landing time
- Designed for delicate handling of products
- Increased yield due to optimal temperature control
- Lower ice consumption
- Interstackable with SÆPLAST 310 tub

Light and easy to handle

Pallets and Containers

Increase your yield by preserving your cold chain. The SÆPLAST 160 is a great transition container from traditional single wall boxes and baskets. The insulated tub features a proven double-wall seamless construction which provides optimal temperature control, in addition to considerable savings in ice consumption.

The SÆPLAST 160 lightweight tub is specially designed for small and medium sized fishing vessels, cold chain logistics and production units with limited refrigeration space. It is light, easy to handle and extremely durable.

The SÆPLAST 160 tub is tailor-made for optimal handling of delicate products. The lower height of the walls prevents excessive pressure on the produce placed at the bottom. The SÆPLAST 160 will secure your products during handling, keep your product cool and optimize your yield.

Additional features include;

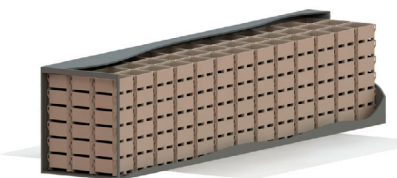

- Easy to wash-down and clean.
- Temperature tolerances range from -30°C to +60°C.
- Forklift and pallet jack access.
- Safe and stable stacking of up to 6 tubs.

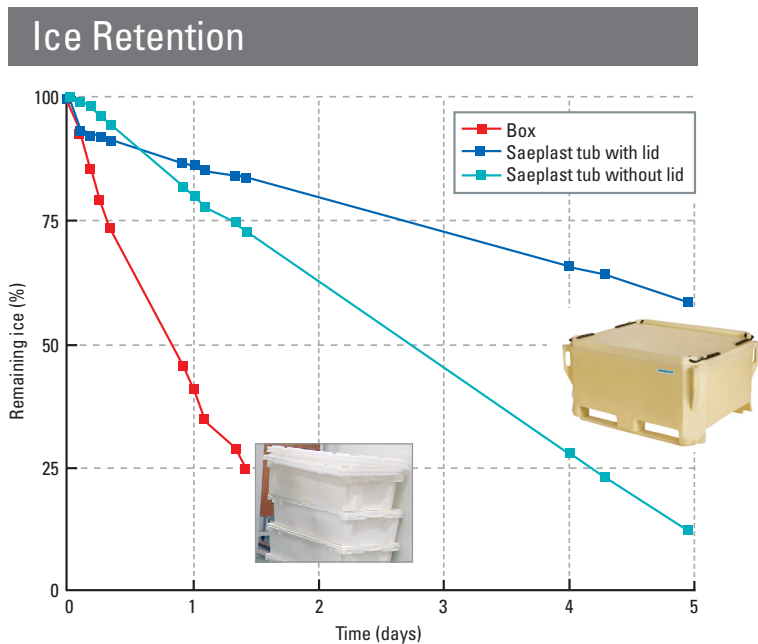

Interstackable with SÆPLAST 310.

Low wall height ensures low pressure on products.

Easy shipping – up to 244 SÆPLAST tubs in a 40 HC container.

Ice retention at ambient temperature of 15–20 °C in SÆPLAST insulated tubs (with and without lid) compared to a single wall plastic box.
